

1.5 kW energy storage solar

Overview

What is a 5 kW on grid Solar System?

The 5 kW On Grid Solar System is a rooftop solar system that is installed on the roof of your home. This type of solar system will provide energy to your home, as well as power anything else you need it to, such as appliances and electronics.

How much electricity does a 1.5kw solar system use?

These days, because panels are both larger and more efficient, a 1.5kW solar system only requires 3 or 4: How much electricity will a 1.5kW solar system generate?

A 1.5kW solar system will generate approximately 6kWh per day. This is under half the electricity consumption of the average aussie household.

Is a 1.5kw solar system a good value?

Due to a scheme called the “solar multiplier” you used to get twice the rebate for the first 1.5kW of any system, compared to subsequent kW. So in terms of dollars per kW, a 1.5kW system represented the best value. However, all that has now changed. The “solar multiplier” which favoured 1.5kW solar systems is gone. But don't panic!.

How many solar panels does a 1.5kw solar panel use?

A 1.5kW solar power system uses 5-6 solar panels to build up the system. Each panel is approximately 1.6m x 1m in size, requiring at least 10-12m² roof space for installation. Therefore, a 10m² roof space is essential for a 1.5kW solar panel system, compared to larger systems that occupy more space.
