

12v step-up 12000 volt inverter

Overview

What is a 12V to 120V inverter?

A 12V to 120V inverter can convert DC power (12V) into AC power (120V), making it compatible with household appliances. These inverters are widely used in off-grid solar systems, RVs, and home backup power solutions, ensuring a stable power supply when the main grid is unavailable.

Do you need a 12V battery inverter?

Nowadays owners of residential solar systems rarely use 12V batteries and instead pick 24V or 48V. However, 12V batteries are very popular among boat and RV owners. For this reason an 12V battery inverter is perfectly suited for a ship or recreational vehicle.
