

# 1MWh Solar Container for Farm Use

## Overview

---

How big would a 100 MW solar farm be?

The average solar PV system size in the United States is 5 MW, so a 100 MW solar farm would be 20 times that size. The average solar farm size in the world is 10 MW, so a 100 MW solar farm would be 10 times that size. The average footprint of a solar PV system is 10 acres per megawatt, so a 100 MW solar farm would have a footprint of 1,000 acres.

Why should you choose Sunway ESS battery energy storage system?

5□ High degree of standardization, integration, rapid deployment, short construction and commissioning period, simplicity and easy maintenance. Sunway Ess battery energy storage system (BESS) containers are based on a modular design. They can be configured to match the required power and capacity requirements of client's application.

What is a containerised energy storage system (BESS)?

They can be configured to match the required power and capacity requirements of client's application. Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects. The energy storage containers can be used in the integration of various storage technologies and for different purposes.

## 1MWh Solar Container for Farm Use
