

200kW Solar-Powered Container Terminals at German Ports

Overview

When will port of Hamburg provide shore power?

The signing ceremony took place along the sidelines of "Transport Logistic 2025" trade fair in Munich, Germany. Since May 2024, the Port of Hamburg has provided shore power for cruise and container ships, committing to equip all container terminals with shore power supply systems by the end of 2025.

How can the port of Hamburg meet its energy needs?

Once vessels connect to the shore power system, they can meet their substantial energy needs entirely with green energy from the public grid. Our strategic vision for shore power in the Port of Hamburg aims to equip all major berths with the necessary infrastructure by 2030, achieving complete coverage by 2040, with support from federal funding.

Did Germany include 2017 shore power supply in the maritime agenda of 2025?

Therefore, the German federal government already included 2017 shore power supply for Sea- and Inlandports in the Maritime Agenda of 2025. The German federal states are responsible for infrastructure measures and therefore for the construction and operation of shore power facilities. Here you will find news, analysis and background.

What is a cross port charging infrastructure?

This includes a cross port charging infrastructure of shore power that supply cruise ships, container vessels, inland vessels, and local port vessels. The energy provided is sourced from renewable resources. Port of Hamburg: A Pioneer in Maritime Decarbonization
