

3 2v15ah lithium iron phosphate battery 60 volt battery pack

Overview

What is a 12V 150ah lithium iron phosphate battery used for?

This 12V 150Ah Lithium Iron Phosphate battery is used to replace standard lead-acid batteries in various applications such as mobility scooters, UPS systems, fire alarm systems, access control systems, and medical devices. It is also gaining popularity in military and aerospace applications. The Canbat CLI150-12 is a UL certified battery.

What is a lithium iron phosphate battery?

Its lithium iron phosphate chemistry ensures thermal stability and resistance to overcharging, making it ideal for applications requiring consistent energy delivery and durability. Compact and efficient, this battery supports high discharge rates while maintaining safety, making it suitable for professional-grade energy storage solutions.

What is a LiFePO₄ battery?

Designed for energy storage applications, this high-capacity cylindrical lithium iron phosphate (LiFePO₄) battery cell delivers exceptional performance and reliability. With a voltage of 3.2V and an impressive capacity of 15Ah, it provides a steady and consistent power supply for your energy storage systems.

What is a 33140 LiFePO₄ battery?

Upgrade your energy storage systems with the 33140 LiFePO₄ battery. With a capacity of 15Ah, this cylindrical lithium iron phosphate battery cell provides ample power to meet your energy demands. Whether you're powering residential or commercial energy storage systems, this battery ensures optimal performance and extended runtime.
