

40-foot folding container for chemical plant

Overview

What is a 40 foot container used for?

A 40-foot container is suitable for lighter or bulky goods. Depending on the density of the goods, it can generally hold around 18-22 tons. What are the types of 40-foot containers?

Used for transporting various general goods. One foot taller than a standard container. Larger but lighter cargo such as furniture and large equipment.

What is a seafold 40 HC container?

SeaFold 40' has the same features as a conventional 40' HC container. Requires no special handling or maintenance equipment. Safe and easy folding and erecting procedure. Compatible with all standard lift equipment found in most ports and terminals. Serviceable by existing maintenance organizations and depots throughout the world.

How much does it cost to ship a 40 ft container?

To give you a clearer idea of the cost of shipping a 40-ft container, we use the example of shipping from China to the United States. The shipping cost is approximately 4,700-6,200\$. If you want the latest container shipping price, please get in touch with us, and you will get the latest quotation and preferential policies.

How is a container transported?

Land delivery: the container is transported from the destination port to the customer's designated location by truck or rail. Unpacking: after the customer receives the container, the seal is broken, and the goods are unloaded. Return of the empty container: the empty container is transported back to the depot or rental company.
