

48v inverter boost module

Overview

What is a boost inverter?

The new inverter is intended to be used in uninterruptible power supply (UPS) and AC driver systems design whenever an AC voltage larger than the DC link voltage is needed, with no need of a second power conversion stage. This paper proposes a new voltage source inverter (VSI) referred to as a boost inverter or boost DC-AC converter.

What is a 12V DC to 36V DC boost converter?

This series of 12V DC to 36V DC boost converters have wide input range of 10V to 25V, output power from 36W to 1080W, different models are optional. Low price DC-DC step up power modules, are provided with overload protection, overvoltage protection.

What is a 12 volt to 48 volt DC boost converter?

12 volt to 48 volt DC boost converter with small size, IP68 waterproof rating, makes the converter ideal for use in a wide range of applications including vehicles, security systems, hospital equipment, telecommunications etc, and commonly used for radio, speaker system, club car, electric bike, solar panel, led lights.

What is the input voltage range of a boost converter?

Wide input voltage range: 10V to 25V. Brand-new, die-cast aluminum shell and high quality design, maximum transfer efficiency of 96%. This boost converter comes with waterproof level of IP68, moisture-proof & anti-shock protection. Auto-recovery when device is back to normal operating.
