

50kW Photovoltaic Energy Storage Container Used in Zagreb Environmental Project

Overview

How a photovoltaic power storage system works?

By stores photovoltaic power in batteries directly and discharges it to the load at night, It has pretty of advantages in solving the consumption problem, including smoothing the load for users and reducing electricity costs. This solution uses 5 sets of modular outdoor cabinet energy storage system, which supports up to 15 units in parallel.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.
