

5MW Off-Grid Solar Containerized Power for Highways

Overview

What is UEI-bess-2.5mw / 5MWh battery energy storage system?

Fully integrated 2.5MW / 5MWh containerized battery energy storage system with MV transformer, dual PCS, EMS, and intelligent monitoring. Ideal for industrial, utility, or microgrid applications in the EU. The UEI-BESS-2.5MW / 5MWh is a turnkey containerized energy storage solution engineered for grid-scale and commercial energy management.

What is a boxpower solarcontainer?

BoxPower's flagship SolarContainer is a fully integrated microgrid-in-a-box that combines solar PV, battery storage, and intelligent inverters, with optional backup generation. Designed for reliability and ease of deployment, the SolarContainer is ideal for powering critical infrastructure, remote facilities, and commercial operations.

How many battery clusters are in a solar power system?

It contains 14 battery clusters of 358.4kWh each (1280V @ 280Ah), two 1.25MW energy storage inverters (PCS), and all necessary components including DC combiner cabinets, MV switchgear, local communication and EMS cabinet, fire suppression, HVAC, lighting, and power systems.

Which solar panels do you use?

We use the highest quality solar panels, including LG, Peimar, and Canadian Solar; these solar panels harvest the sun's power and stores the energy in high-quality lithium batteries, controlled with an external BMS. Then the power is distributed using Victron Multiplus units, so this inverter/charger can transfer the power.
