

5g signal tower battery solar container communication station inverter

Overview

What is a 5G solar power platform?

Hybrid power: On the basis of 5G power platform, solar power is smoothly introduced. In areas with good grid, the solutions upgrade smoothly among grid, solar hybrid and pure solar power to achieve low-carbon and zero-carbon.

What is 5G power & iEnergy?

Fully meet the requirements of rapid 5G deployment, smooth evolution, efficient energy saving, and intelligent O&M. Including: 5G power, hybrid power and iEnergy network energy management solution. 5G power: 5G power one-cabinet site and All-Pad site simplify base station infrastructure construction.

What are containerized solar power solutions for the cellular industry?

Our Containerized Solar Power Solutions for the Cellular Industry are engineered to run 100% on solar power. They are equipped with battery storage and a AC or DC generator as an additional backup system to guarantee service continuity. All systems can be grid-tied or completely off-grid.

Could a 5G power outage be a disaster?

Telecom infrastructures are connecting our society, but power outages could be a disaster because even the smallest fluctuation in power could result in communication blackouts or network failures. Investing in a telecom battery backup system is always one of the priorities for telecommunication operators in the 5G era.
