

60kWh Off-Grid Solar Container for Data Centers

Overview

Power: 60kW / 360VDC Voltage: 110V - 240V Output: 220-415VAC 50/60hz
Function: wifi Protections: Overcharge, Discharge, Overdischarge 2 years warranty Charging efficiency: 99,9% Smart load control
How can a data center use solar energy?

Companies can install solar panels on rooftops, parking lots, or adjacent land to maximize solar energy generation. Power storage solutions, such as batteries, enable data centers to store excess energy for use during periods of low solar generation or high energy demand.

Why do data centers need a power storage system?

Power storage solutions, such as batteries, enable data centers to store excess energy for use during periods of low solar generation or high energy demand. Backup systems and grid connectivity provide additional reliability and flexibility, ensuring continuous power supply.

Can solar power power data centers & IT infrastructure?

Solar power has emerged as a game-changing solution for powering data centers and IT infrastructure. In recent years, the increasing concern for environmental sustainability and the rising energy demands of these facilities have propelled the adoption of solar power.

When did solar power become a trend in data centers & IT infrastructure?

The journey of solar power adoption in data centers and IT infrastructure dates back to the early 2000s when companies started exploring renewable energy sources. However, it wasn't until the last decade that significant strides were made, thanks to advancements in photovoltaic technology and decreasing costs.

60kWh Off-Grid Solar Container for Data Centers

[Intech Energy Container](#)

The Intech Energy Container is a fully autonomous power system developed by Intech to provide electricity in off-grid locations. Each container is equipped with a photovoltaic array, a battery ...
