

60kWh UK Solar Container

Overview

What is a solatiner® Solar System?

Modelled on a 20ft ISO shipping container, Solatiner® has been designed to deliver maximum solar gain and efficiency. When used alongside Ecoxero's ground-breaking Solawedge® [**link to page**](#) the unit can scale up to 200kw. A standard Solatiner® set up includes a 4Kw PV array, 15Kw/h battery pack and 15Kw stand-by generator.

Can a containerized Solar System be installed off-grid?

Off-Grid Installers have the answer with a containerized solar system from 3 kw up wards. Systems are fitted in new fully fitted containers either 20 or 40 foot depending on the size required.

What is an off grid solar container unit?

Attaching to the grid can also be expensive and this can be an issue in the UK as well as Africa or Latin America. An Off Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres.

Are off grid solar containers reliable?

Solar equipment is very reliable but occasionally parts may fail so there is need to monitor and solve any problems. Off Grid Solar container units guarantee security and reliability and allow the engineering team to complete installations in a few days rather than weeks.
