

6V 40W solar Panel

Overview

What is a 6 volt solar panel?

WSL Solar's 6V solar panels are built with the latest most efficient crystalline silicon solar cells or super high efficiency Sunpower solar cells. These 6 volt solar panels are great for charging your 3.7V DC batteries and ideal for use in off grid applications such as GPS tracking, educational kits, small electronic devices, LED lighting etc.

What is a 40 watt solar panel?

Luminous solar panel 40 Watt 40 watt solar panel is used with solar charge controllers to charge the small battery and run DC loads. It is a small solar panel with height of 3.3 feet and width 2.3 feet. During the day when sunlight is available, it converts 5 amp current into useable electricity.

Is a 40W solar panel enough?

40W solar panel is enough to recharge your small appliances like cell phones, portable Fans, and LED lights. So in short, you'll only be able to get 200 watts of total power output from your 40W solar panel so is that what you need?

then it is enough for you.

How many volts does a 12V 40W solar panel produce?

Under ideal sunlight conditions, a 12v 40W solar panel will produce 18 volts, 2.2 amps, and 40-watt voltage output will depend on the intensity of the sun so which means it will fluctuate a lot so does the current. So you'll need a charge controller or regulator to manage the flow of voltage so you can charge your 12v battery.
