

ASEAN develops integrated energy storage projects

Overview

Does ASEAN need energy storage?

Determinedly, the region has set the targets of 23 per cent renewable energy share in Total Primary Energy Supply (TPES), and 35 per cent share of renewable energy in ASEAN installed power capacity by 2025. This means that energy storage is required. What Is The Status Quo?

.

Does ASEAN have a policy for promoting battery energy storage?

According to the ASEAN Centre for Energy (ACE) Policy Brief: Enabling Policies for Promoting Battery Energy Storage in ASEAN, only a few AMS have related policies. For instance, Thailand's Ministry of Energy presented its 'Energy 4.0' strategy by integrating disruptive energy technologies such as energy storage systems.

Is energy storage the future of Southeast Asia?

As renewable energy sources will play a more prominent role in the region's sustainable development, the integration of energy storage systems in Southeast Asia is imminent. Energy storage seems to be facilitating the transition towards clean and sustainable energy, particularly for islands and rural areas within the region.

Does ASEAN have an Energy Transition Index?

In 2025, most ASEAN countries had achieved an energy transition index higher than the average, reflecting the region's efforts towards energy transition. One of the critical aspects of the energy transition is ensuring that the necessary infrastructure, technologies, and policies are in place to accelerate the integration of renewable energy (RE).
