Overview

Will solar energy be a mainstay in Asean's energy mix?

In Malaysia, the introduction of the Net Energy Metering and tax allowances serve as catalysts for solar PV installation, while government-led tariff adjustments further propel the adoption of solar energy. These concerted efforts show how solar energy is set to be a mainstay in ASEAN's energy mix for decades to come.

What will ASEAN's Energy Outlook look like in 2022?

In 2022, at the 7th ASEAN Energy Outlook meeting, it was forecasted that energy needs by 2050 would be tripled compared with 2020 levels, and this will prompt a shift from fossil fuels to renewables, notably solar and wind.

How much solar power will Southeast Asia produce in 2022?

Southeast Asia's total solar and wind energy generation have surged from 4.2 terawatt-hours (TWh) in 2015 to over 50 TWh in 2022. To put this into perspective, just 1 TWh could power about 10 billion 100-watt lightbulbs simultaneously. Looking ahead, ASEAN leaders have set ambitious goals for the region's energy future.

Is Southeast Asia ready for solar energy?

Positioned near the equator, Southeast Asia's solar irradiance levels was up 10 per cent in 2023, highlighting the region's potential for solar energy advancement. Southeast Asia's total solar and wind energy generation have surged from 4.2 terawatt-hours (TWh) in 2015 to over 50 TWh in 2022.
