

Abu Dhabi Power Plant Off-Grid Energy Storage Power Generation Project

Overview

Will Dubai's new solar power plant be able to operate 24/7?

The facility will be capable of operating 24/7 on renewable energy. This will also be the world's first 24/7 solar PV, battery storage gigascale project, according to Abu Dhabi Future Energy Company (Masdar) and Emirates Water and Electricity Company (EWEC), which are part of the project.

Why should UAE invest in solar power & battery energy storage?

The world-leading project reflects the vision and commitment of the UAE leadership in driving socioeconomic and environmental progress. The accelerated integration of solar power and advanced battery energy storage sets a new benchmark in clean energy, driving sustainability and reducing carbon emissions.

Can a solar power plant deliver 'baseload' power 24/7?

Pairing 5.2GWdc of solar PV generation with 19GWh of battery storage capacity will enable the plant to deliver up to a gigawatt of 'baseload' power 24/7, every day. Al Jaber claimed, 'For decades, the biggest barrier facing renewable energy has been intermittency.'

Is Dubai a good place to invest in solar power?

The region does boast some of the world's most ambitious solar PV projects, such as the Mohammed bin Rashid Al Maktoum Solar Park in Dubai, which has a planned 5GW generation capacity by 2030 from both solar PV and concentrated solar power (CSP).
