

Abu Dhabi power supply side energy storage policy

Overview

What is energy supply in Abu Dhabi?

Electricity or heat. Energy supply: Amount of energy available for use in Abu Dhabi (e.g., energy from natural gas, crude oil, electricity). Energy system: Abu Dhabi's energy system that includes all the elements necessary to produce, deliver, and use energy, such as power plants, transmission/distribution lines, storage and end use.

What will Abu Dhabi's energy policy look like in 2035?

Electricity sector. Once realized, the framework will see 60% of Abu Dhabi's power being generated from clean and renewable energy sources by 2035 and up to 75% reduction in the power sector's carbon emissions intensity (tons of carbon dioxide (CO₂) emitted per megawatt hour).

What are the laws relating to water and electricity in Abu Dhabi?

Law No. (2) of 1998 concerning the organisation of the Water and Electricity Sector in the Emirate of Abu Dhabi and its amendments. Law No. (11) of 2018 concerning the establishment of the Department of Energy, and in particular: Article 4.1 related to the strategic and implementation of plans for the energy sector in the Emirate.

Could a 400-megawatt battery energy storage system be built in Abu Dhabi?

State-owned Emirates Water and Electricity Company has requested proposals from 27 qualified companies and consortiums to develop a greenfield 400-megawatt battery energy storage system project in Abu Dhabi. The request for proposals is being issued to bidders who passed the qualification process following the expression of interest in April 2024.
