

Add solar panels to solar power generation

Overview

How do I add solar panels to my existing system?

If you want to add solar panels to your existing system, the first step is to contact your original installer or another certified PV professional. During your consultation, you can determine which upgrades will be necessary to accommodate the new panels. Is it worth adding more solar panels?

.

Should you add solar panels to your home?

If you own your system or pay for it with a loan, adding panels to your existing system makes more sense, as it's your system, so you don't have to worry about contracts and lease payments. Depending on the size of your home, you might not even have enough space to add a few more panels.

Should I add solar PV panels?

This can help determine if adding solar PV panels is the best action. Alternatively, if the PV system has a string inverter and no power optimizers, you can bump up the solar energy production by adding them. This is especially true on shaded roofs or where the panels have different orientations.

Can I add more solar panels if my roof is old?

Do not add more solar panels to your system if your roof is old, it is a leased system, or if you do not have enough roof space for extra panels. Contact your original solar installer to add more panels to your system. Why add solar panels to an existing solar system?

Add solar panels to solar power generation

[How to Add More Solar Panels to an Existing System](#)
