

Albania Energy Storage Period Inspection

Overview

What is the situation in the development of the energy sector in Albania?

The situation in the development of the energy sector in Albania 2.1. Electricity production for 2023 8,796 GWh of electricity, almost 11% more than the energy consumption. increase in production by 25.6% compared to 2022, where it was 7,003 GWh.

Should Albania's energy mix include more renewables?

While Albania's energy mix already features one of the highest shares of renewables in the region owing to its extensive installed hydropower capacity, the essential need remains for a more secure, cost-competitive national energy supply. Diversifying the electricity mix to include more renewables would strengthen Albania's energy security.

Does Albania have a strong focus on hydro vs non-hydro renewables?

The Albanian Renewable Energy Association, due to the country's history of hydropower production, has a stronger focus on hydro than non-hydro renewables.

Does Albania need a skilled workforce?

In line with Albania's commitment to a higher share of renewable energy deployment, a skilled workforce needs to be nurtured from the onset. Currently, Albania lacks dedicated renewable energy training curricula at vocational, tertiary and technical schools.
