

# **Amsterdam Communications 5G Base Station Project Department**

## Overview

---

What does 5G mean for the Netherlands?

The introduction of 5G means the Netherlands will continue to have a fast and stable mobile network in the future. Mobile data usage is increasing. For example, people now watch films while travelling. And farmers' drones, industrial machinery and self-driving cars all use mobile data.

What are 5G base stations?

Conferences > 2023 8th Asia Conference on P. As a key technology of the fifth-generation communication technology, 5G base stations bring high-speed communication and high electricity costs.

How will 5G telecommunication technology help the Netherlands & Belgium?

These developments are expected to improve accessibility of a key logistical corridor between the Netherlands and Belgium (Vlissingen – Ghent – Antwerp), as well as creating more jobs and strengthening the competitive position of the region. New 5G telecommunication technologies can be deployed as a useful resource in this area.

Do 5G spectrum bands improve traffic capacity in the Netherlands?

Based on the inputs of this analysis, we find that 5G spectrum bands provide an average per user traffic capacity improvement of approximately 40% for the Netherlands in comparison with the existing LTE capacity. 1. Introduction
