

Arc flash switchgear in China in Auckland

Overview

How can arc flash analysis help a facility in New Zealand?

Industries in New Zealand must understand the causes and safety measures to safeguard their facilities from these hidden threats. An Arc Flash analysis from Care Labs can help maintain safety, compliance, operational reliability, and efficiency in a system, by and large. today!.

How common are arc flashes in New Zealand?

According to Worksafe, New Zealand data, two to four arc flash incidents occur annually in the country. Although electrocution tops the list of electrical hazards in the workplace, arc flashes can reap heavy damages and even fatalities.

Can a switchgear cause an arc flash incident?

For example, during peak load conditions, an outdated switchgear can cause an arc flash incident to happen. Protective devices like relays, if not coordinated properly can result in cascading faults that escalate to arc flash incidents and costly disruptions in the system.

What arc flash mitigation solutions do you offer?

We offer a variety of arc flash mitigation solutions, such as switchgear, software, and circuit breakers, for both passive and active arc flash protection. Our systems comply with the National Fire Protection Association (NFPA) 70E: standard for electrical safety in the workplace. Need help?
