Are arc flash and arc-flash studies a safety concern?

Arc-flash and arc-flash studies are also clarified. This White Paper also highlights a safety concern when HV/MV switchgear fails catastrophically, particularly oil-filled switchgear assembly. Within IEC Standards, HV switchgear are used on systems above 1 kV up to 52 kV. In North America MV is any voltage between 600 V and 69 kV.

Does Eaton offer arc flash protection?

Eaton has retrofit solutions to replace or modify (or low voltage as appropriate), which result in a system that provides superior arc flash protection at the transformer secondary. This solution is especially useful for installations that do not use a secondary main (NEC 6-disconnect rule).

What is an arc flash?

According to the National Fire Protection Association (NFPA®), an arc flash occurs “when an electric current passes through air between ungrounded conductors or between ungrounded conductors and grounded conductors.” Temperatures can reach 35,000 °F— three times hotter than the temperature of the sun.
