

Asuncion balcony solar system installation

Overview

Is balcony solar reshaping the solar industry?

This change has exploded adoption and is reshaping the industry. In the United States, off-grid “Balcony Solar” systems are allowed but grid-tied “Balcony Solar” is not allowed by the US electrical code because back-fed outlets are prohibited — except for in Utah (March 2025)!

How does balcony solar work?

Just plug in! It’s really that easy. “Balcony Solar” is a totally independent power system, so to use it you’ll need to plug your devices directly into the portable power station and it basically operates like a giant battery. Remember, every watt of electricity you generate from here is free fuel for your favorite device!.

Is balcony solar allowed in the US?

In the United States, off-grid “Balcony Solar” systems are allowed but grid-tied “Balcony Solar” is not allowed by the US electrical code because back-fed outlets are prohibited — except for in Utah (March 2025)! We have hope that this policy may change to align with the European model.

Is balcony solar off-grid?

If you want to brag about your new “Balcony Solar” install, it’s true that any device connected to the power station is “off-grid”. If you have a monitoring system, you can track your power generation, and leverage peak charging times with extra sun exposure. Most importantly, enjoy the empowering feeling of making your own power!
