

Athens Solar Power System

Overview

Does Greece have a plan for rooftop solar PV?

November 2023, Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables, from which 13.4 GW came from solar power capacity. However, there is no roadmap or strategy at this time in regards to rooftop solar PV in particular.

What impedes solar development in Greece?

Currently, probably the main reason that impedes solar development and that makes administrative procedures long and burdensome in Greece, including rooftop solar, is grid availability. In many areas, applications for solar rooftop PV are being rejected due to lack of electricity grid capacity.

How many active energy communities are there in Greece?

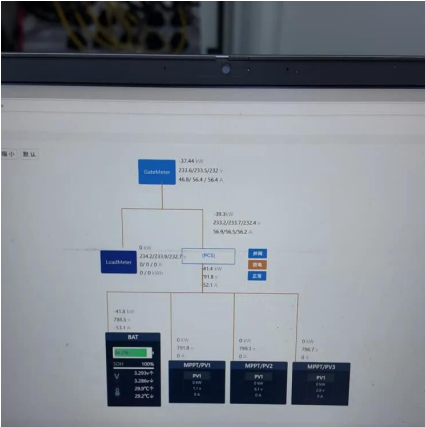

Active Energy Communities: Greece is a frontrunner, when it comes to the community energy movement, with an establishment of over 1,600 active energy communities since August 2023.

How does energy sharing work in Greece?

Energy sharing is facilitated through energy communities and Greece is a frontrunner in establishing energy communities, with over 1,600 communities active since August 2023. Recent legislation introduced new types of energy communities, prioritising self-consumption projects and limiting profit distribution to prevent exploitation.

Athens Solar Power System

[Athens a leader in green power and solar energy . News](#)

Apr 16, 2025 · In 2023, Athens installed solar arrays on East State Street producing 2.1 megawatts of electricity. These solar arrays provide power to the Athens Wastewater ...
