

Australian rooftop solar energy storage companies

Overview

How many approved rooftop solar products are there in Australia?

There are currently 4,829 approved rooftop solar, inverter and storage products across Australia, which represents a 33 per cent decrease compared to the previous bi-annual report, largely due to changes in standards causing many listings to expire over a short period. A breakdown of the number of each product type is seen below.

Why should you invest in energy storage in Australia?

They store solar and wind power for use during peak demand or outages, supporting grid resilience, lowering costs, and accelerating the transition to clean energy. Australia's energy storage market is experiencing strong growth due to rising electricity prices, rapid solar adoption, and increasing demand for reliable backup power.

What are the best solar power solutions in Australia?

Widely adopted across Australia, Tesla's solutions are recognized for high efficiency, scalability, and integration with solar PV systems. Known for both inverters and battery solutions, Sungrow's PowerTitan and PowerStack deliver strong performance for large-scale projects.

How many rooftop PV systems are installed in Australia?

Queensland and New South Wales hold over half of all rooftop PV installations across Australia. Battery attachments to rooftop PV systems continues to trend upwards, with 185,798 units now installed across Australia. The second half of 2024 saw 45,233 units sold – 55 per cent more than the same time 12 months ago.
