

Austria portable ups uninterruptible power supply

Overview

What is a static uninterruptible power supply (UPS)?

Our static uninterruptible power supply (UPS) systems comply with the VFI-SS-11 classification according to IEC 62040-3. With their robust industrial design, they support a secure consumer supply in continuous operation.

Why should you choose a portable ups power supply system?

Designed for reliability, fast charging & long-lasting performance, our portable UPS power supply systems ensure your essential devices stay running smoothly during power outage. Keep your home and office running with seamless UPS backup. High output power, ultra-fast charging, and expandable capacity, staying powered and prepared!.

What is an uninterruptible combined UPS system?

The uninterruptible combined UPS units include an economical 24 V DC switched mode power supply with an integrated charge and control unit for optimal battery management. These space-saving combined UPS systems control and monitor the connected battery modules, providing early warnings when battery life expectancy is low.

How many UPS & battery systems have been installed in Switzerland?

More than 30'000 UPS and battery systems have been successfully delivered, installed and are in operation at more than 3'000 clients in more than 100 countries. This success is based on traditional Swiss values that focus on technical excellence and quality in all areas of operation. We welcome you to be part of it.
