

Automatic Folding Container Type for Subway Stations

Overview

What types of boxes can a box folding machine handle?

A box folding machine can efficiently handle various types of boxes for express packaging. For example, our VCE Case Erector can handle regular slotted container (RSC), half slotted container (HSC), and all-flaps-meet (AFM) carton styles.

What is automated container loading & unloading?

Adaptable to various dock setups within warehouses, our Automatic Robotic Container Loading and Unloading Solution offers unparalleled flexibility. With remote control functionality, this robotic solution guarantees both safety and efficiency in material handling operations.

What is automated box folding?

Ensuring consistent and accurate box folding. With automated technology, boxes are folded precisely according to the predetermined dimensions and specifications. This eliminates variations in box folding that may occur with manual processes, resulting in neat and uniform packaging.

What is a box folding machine?

A box folding machine helps streamline the packaging process by automating the folding of different types of boxes. These machines are commonly used in industries that require fast and efficient packaging, such as pharmaceuticals, e-commerce, and food packaging. How Do These Machines Work?

The cardboard sheets are loaded into the machine's feeder.
