

Banji Smart solar Water Pump Inverter

Overview

What is the new solar water pump inverter Sp100 series?

After years of deep cultivation and exploration in the solar water pump industry, INVT has carefully developed a new solar water pump inverter: SP100 series. SP100 has comprehensively upgraded the usability, functionality, and performance of its existing solar water pump products.

What is a solar pump inverter?

Solar pump inverter is an essential component for powering 3-phase water pumps using solar energy. It converts the DC power generated by solar panels into AC power that can be used to drive the water pump, providing an efficient and sustainable solution for water pumping needs.

Is a solar pump inverter a good choice?

With its advanced features and reliable performance, a solar pump inverter is an excellent choice for those seeking to harness the power of the sun for their water pumping needs. The Sunmoy solar pump inverter offers several advantages over traditional water pumping solutions and other solar pump inverters, including:

What makes Sp100 a good solar water pump?

SP100 has comprehensively upgraded the usability, functionality, and performance of its existing solar water pump products. Adopting IP66 high protection design, SP100 can be directly used outdoors without the need for additional cabinets. And it supports external IoT devices and achieves status monitoring and remote control of the inverter.
