

Battery Energy Storage Manufacturing Plant in North America

Overview

Where are Panasonic Batteries made?

Panasonic opens one of the largest battery manufacturing sites in North America with the launch of its US\$4bn facility in De Soto, Kansas. The 4.7 million square foot gigafactory starts mass production of cylindrical lithium-ion 2170 battery cells on 14 July.

Where are batteries made?

Battery manufacturing in America spans from established operations like East Penn Manufacturing, founded in 1946 with initial production of five battery types, to newer facilities such as Stryten Energy's current 15 GWh annual production capacity.

Where are LG batteries made?

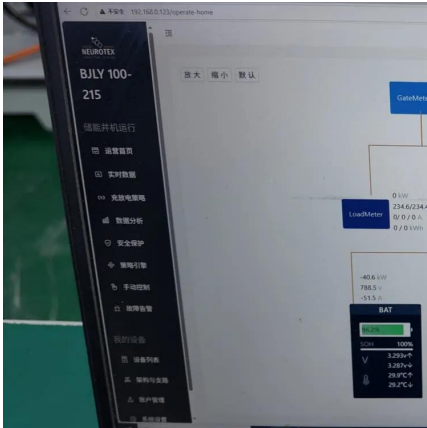

The complex consists of two manufacturing facilities which are the company's first stand-alone cylindrical and ESS battery plants in North America. The cylindrical battery plant, called LG Energy Solution Arizona, will produce 46-Series batteries for electric vehicles (EV).

Are EV batteries being built in North America?

North America is experiencing an unprecedented surge in the construction of EV battery factories. Explore where plants are being built, who's investing, and what this means for the electric vehicle revolution.
