

# Battery energy storage project construction

## Overview

---

What is the electro-chemical battery energy storage project?

The electro-chemical battery energy storage project uses hydrogen energy storage as its storage technology. The project was announced in 2013 and was commissioned in 2013. Combine business intelligence and editorial excellence to reach engaged professionals across 36 leading media platforms. Description.

Who has delivered the battery energy storage project?

Audi, Etogas and MAN Energy Solutions have delivered the battery energy storage project. Additional information The Stuttgart-based plant manufacturer ETOGAS GmbH (formerly SolarFuel) has timely developed and built the world's largest power-to-gas plant. Customer and operator is the Audi AG.

Where is the battery storage project located?

The Lancaster Battery Storage project is located in Lancaster, California (Los Angeles County) and is comprised of a 127-MW transmission-connected stand-alone battery.

What is a 200 MWh energy storage station?

The energy storage station is the first phase of a 200-MWh project and consists of 42 battery bays. It can store 100,000 kWh of electricity on a single charge, releasing power during peak periods to meet the needs of about 12,000 households for a day and reducing CO2 emissions by 13,000 tons per year, according to Hina Battery.
