

# Beirut China Vanadium Energy Storage Project

## Overview

---

What is a giant solar-plus-vanadium redox flow battery project in Xinjiang?

A giant solar-plus-vanadium flow battery project in Xinjiang has completed construction, marking a milestone in China's pursuit of long-duration, utility-scale energy storage. China has completed the main construction works on the world's largest vanadium redox flow battery (VRFB) energy storage project.

Where is the Xinhua ushi ESS vanadium flow battery located?

The Xinhua Ushi ESS vanadium flow battery project - termed the world's largest - is located in Ushi, China.

How much energy can a vanadium flow battery store?

A press release by the company states that the vanadium flow battery project has the ability to store and release 700MWh of energy. This system ensures extended energy storage capabilities for various applications. It is designed with scalability in mind, and is poised to support evolving energy demands with unmatched performance.

How long can a vanadium flow battery last?

Vanadium flow batteries provide continuous energy storage for up to 10+ hours, ideal for balancing renewable energy supply and demand. As per the company, they are highly recyclable and adaptable, and can support projects of all sizes, from utility-scale to commercial applications.
