

# **Berlin Wind and Solar Energy Storage Project**

## Overview

---

Does Germany have a solar-plus-storage innovation tender?

Image: Baywa r.e. The German Federal Network Agency (Bundesnetzagentur) has awarded 587MW of solar-plus-storage in its latest Innovation Tender. As has been the case in many of Germany's recent solar PV auctions, the Innovation Tender ended up oversubscribed, with 154 bids made for 1.8GW of capacity out of 583MW tendered capacity.

Why should we invest in solar parks in Germany?

Germany is a country with an increasing amount of renewable energy. BESS are a key technology for this, as the plant in Bavaria shows. Result Through the combination of expertise and suitable solutions, solar parks like the one in Bavaria become a cornerstone of sustainable energy transformation.

How many MW of solar-plus-storage capacity will be awarded?

Both capacity bid for and awarded were higher than the previous innovation auction held in July 2024, which awarded 512MW of capacity for solar-plus-storage projects. The Innovation Tender solicitations were launched in 2020, and are open to project bids that combine two or more renewable or clean energy technologies.

How many MWh can a German solar park produce a year?

In total, the facility can produce up to 10,000 MWh per year, with its establishment supported by the German government: Due to the sustainability of the solar park, it benefits from subsidies provided by German programs to strengthen renewable energies. Germany is a country with an increasing amount of renewable energy.

## Berlin Wind and Solar Energy Storage Project
