

Berlin solar Energy Storage BESS Branch

Overview

Should solar and battery storage be co-located in Germany?

The case for co-locating solar and battery storage is gaining fresh momentum in Germany. The value drivers are familiar — shared infrastructure, optimised grid usage, stacked revenues. But historically, co-located projects have struggled to scale, constrained by regulation and commercial complexity.

Who is Bess Germany?

At BESS Germany we specialize in the development of BESS projects in Germany. Our clients are institutional investors and family offices who acquire our projects in various stages - from our exit after ready-to-build status is confirmed, to realizing the entire battery storage systems, as well as operating the system for the investor.

How many battery projects are coming to Germany by 2027?

Another four utility-scale battery projects in Germany are set to go live by 2027. Energy storage provider Return has partnered with Berlin-based Bessmart to develop and connect four battery storage plants in Brandenburg, Saxony-Anhalt, and Saxony. The facilities, totalling 310 MW/670 MWh, are set to become operational starting in 2027.

Where is Bess based?

Typically working with local development partners, the business is active in the UK, Australia, Italy, Germany, and Sweden. It has more than 500MWh of operating BESS projects, with over 1GWh under construction and a development pipeline of about 7GW.
