Overview

What is an uninterruptible power supply in South Africa?

Sales South Africa: Computer hardware sales. An uninterruptible power supply, also uninterruptible power source, UPS or battery/flywheel backup, is an electrical apparatus that provides emergency power to a load when the input power source, typically mains power, fails. *Note: A UPS will beep continuously when power is off. This is normal.

How much does a ups cost in South Africa?

An uninterruptible power supply (UPS) protects delicate electronics and appliances during load shedding and reduction in South Africa. UPSs can range widely from R5,000 to R 190,000+, depending on your model, brand, UPS capacity, battery type, features, and warranty.

What is an uninterruptible power supply?

An uninterruptible power supply, commonly known as "UPS Power Supply" is a device that is designed to supply power to your computers, servers and data centres in case of main power failure, electrical surge or unexpected power cut off.

What is a ups & how does it work?

A UPS is short for uninterruptible power supply; a battery system device automatically switches on to become the power source when it detects an outage or fluctuation in AC power. A UPS can also protect connected devices from damage due to power problems, like voltage dips or surges.
