

Blown fuse in circuit breaker in Sri-Lanka

Overview

Have you ever heard the saying “too much of a good thing?”

” This is definitely the case with electricity. Circuit breakers and fuses are designed to protect your electrical system by preventing too much current.

What causes blown fuses & tripped Breakers?

One of the most common causes of blown fuses and tripped breakers is an overloaded circuit. When too many electrical appliances are in use on a single circuit, they draw more power than the circuit can safely handle.

What is a blown fuse?

A blown fuse is a safety device that ‘blows’ when too much current is present in an electrical circuit. It stops the current flow, thus avoiding further damage. Reasons for this include: Knowing why a fuse ‘blows’ can help identify and sort out problems swiftly. Figuring out the cause of a blown fuse is really important!.

Are blown fuses and tripped circuit breakers dangerous?

In summation, blown fuses and tripped circuit breakers can become common occurrences, but they should never be ignored. They are often symptoms of underlying issues that, if left unaddressed, can escalate into more serious problems such as potential fires or damage to electrical appliances.
