

Boston Small Solar Power Generation System

Overview

Do solar systems work in Massachusetts?

Many people have the misconception that solar (PV) systems do not work in Massachusetts, due to New England's diverse weather conditions. However, the experts agree that Massachusetts is an excellent location for solar systems. This section describes the different types of solar energy and how they are used in Massachusetts.

Is Massachusetts a good place for solar energy?

However, the experts agree that Massachusetts is an excellent location for solar systems. This section describes the different types of solar energy and how they are used in Massachusetts. In addition, find out what solar programs and incentives are currently available for your home, business, or institution.

How much solar power does Massachusetts have?

Let's dive in! With over 2.9 gigawatts of solar capacity distributed across 70,000 installations as of 2021, Massachusetts ranks 12th nationally for cumulative solar wattage installed. Solar accounted for about 5.4% of Massachusetts' net electricity generation last year. And as the charts below depict, momentum is accelerating.

How many homes in Massachusetts have gone solar?

Solar electrical capacity mapped by county across Massachusetts (Source: Massachusetts Clean Energy Center) At the household level, over 100,000 Massachusetts single-family homeowners have already gone solar. Interconnection policies ensure seamless integration of home solar energy into the statewide grid.
