Will Brazil conduct the first energy storage auction?

Brazil is set to conduct the country's first-ever energy storage auction for adding batteries and storage systems to the national power grid.

Could pumped hydro be the missing piece in Brazil's energy system?

Conclusion Although energy storage solutions have yet to be widely deployed in Brazil, generation flexibility remains a scarce commodity. Therefore, storage projects, including pumped hydro, could be the missing piece needed to enhance the country's energy system.

Can Brazil be a big battery storage country?

With well-designed policies and regulations, Brazil has significant potential to follow in the footsteps of jurisdictions like California and Chile for large-scale battery storage, Germany for distributed and large-scale storage, and Australia for both pumped hydro and large-scale battery systems.
