

# **Budget Scheme for Three-Phase Solar Container**

## Overview

---

Can you connect solar power to a 3 phase solar system?

Connecting solar power to a three phase solar system supply is entirely possible. But you need to decide how you are going to connect your solar system to the grid. Your 3 options are: 1) connect your solar system to only one of your supply phases with a single-phase solar inverter.

Can a containerized Solar System be installed off-grid?

Off-Grid Installer have the answer with a containerized solar system from 3 kw up wards. Systems are fitted in new fully fitted containers either 20 or 40 foot depending on the size required.

What is a 3 phase solar inverter?

3 phase solar inverter start at about 5kW so if you want an inverter smaller than 5kW you are looking at single-phase. If you want a system with an inverter larger than 5kW then your local Electricity Network may insist that you use more than one phase. The best way to do this is to use a 3 phase inverter.

How do I connect my solar system to a 3 phase inverter?

Your 3 options are: 1) connect your solar system to only one of your supply phases with a single-phase solar inverter. 2) connect your system into all 3 phases of your supply with a single, 3-phase solar inverter 3) connect your system into all 3 phases with 3 separate single-phase inverters.

## Budget Scheme for Three-Phase Solar Container
