

Cambodia Home solar System

Overview

Is solar power transforming remote communities in Cambodia?

Solar power is transforming remote communities in Cambodia with affordable, renewable energy and the chance to live more productive lives. However, hundreds of other villages remain off the grid, and energy experts say Cambodia should be doing more to harness the country's immense amount of untapped sunlight.

How many solar PV projects are there in Cambodia?

Scores of seven solar photovoltaic (PV) projects are in the pipeline for construction and planned for operation by 2023. The Cambodian government aims to generate 20 percent of energy from renewable energy. This is our guide to Solar Energy in Cambodia.

Does Cambodia have solar power?

Cambodia benefits from consistent sunshine year round, making it perfectly suited to solar power production. A 2016 Mekong Strategic Partners report estimated that the country has the potential to generate 700MW of electricity through solar power.

Where are solar power plants located in Cambodia?

Currently, solar power plants providing a total of 160 mW are located in Bavet city, Svay Rieng province, Kampong Speu province, and Kampong Chhnang province. Cambodia's existing solar power stations are already generating energy and linked to the grids.
