

Cambodia invests in solar glass project

Overview

Will Cambodia increase its solar energy investment by 12%?

Rattanak said during a forum on energy in Phnom Penh in July organized by the American Chamber of Commerce. The Cambodian government has said it will increase its investments in solar energy by 12% by year-end 2020 and by 20% over the next three years, up from less than 1% at present.

How many solar farms are being built in Cambodia?

That tracker also reveals 620 MW of capacity is on the way from two solar farms currently under construction, with an additional four installations planned. Cambodia is also set to enhance its renewable energy infrastructure with two new storage projects, according to Minister of Mines and Energy Keo Rottanak.

How many energy projects are coming to Cambodia?

The Cambodian Cabinet approved four energy projects this past April, a US\$231 million hydroelectric power and three solar power projects with a combined, rated, maximum power capacity of 140 MW. The latter are expected to come online and dispatch power to the national grid by 2020 and 2021 in four different provinces.

Can Cambodia push for a greener energy future?

“Cambodia has an opportunity to push for a greener energy future by requesting investment specifically in clean technologies like solar, battery storage, and closed-loop systems of pumped storage hydropower,” she said. So far, large-scale solar farm development has moved slowly in light of the country’s immense amount of untapped shine.
