

Cambodia solar rooftop power generation system

Overview

Can rooftop solar power be used in Cambodia?

Further, H.E. emphasized that “Principles for permitting the use of Rooftop Solar Power in Cambodia” will provide more clarity on the use of rooftop solar power of electricity consumers.

Will solar power boost Cambodia's energy share?

Phnom Penh, Cambodia — Cambodia is on track to significantly boost its solar energy share, with new figures projecting solar to make up 7% of the country’s electricity supply by 2025. This equates to a total installed capacity of 530.14 megawatts (MW) —a major leap from 3.2% in 2023 and 4.6% in 2024.

How many solar farms are being built in Cambodia?

That tracker also reveals 620 MW of capacity is on the way from two solar farms currently under construction, with an additional four installations planned. Cambodia is also set to enhance its renewable energy infrastructure with two new storage projects, according to Minister of Mines and Energy Keo Rottanak.

Does Cambodia have a solar generation regulation?

In 2018, Cambodia introduced a solar generation regulation, a new driver for the country’s solar PV system development. Cambodia’s grid-scale solar development started with just a 10 MW pilot in 2017.
