

Can electricity from solar panels be sold

Overview

Can you sell solar power to the grid?

Although many people with solar systems on their homes or businesses think that they can sell excess electricity to the power grid, the reality is that you can only sell power to the grid if you have an electricity generator's license and qualified power-generating assets.

Can you sell excess electricity from solar panels?

Selling excess electricity generated by solar panels offers a valuable opportunity to reduce energy costs and generate additional income. By understanding net metering, feed-in tariffs, and other revenue streams like SRECs, you can maximize the financial benefits of your solar system.

Can electricity be sold?

When homeowners and businesses produce more energy than they need to power their facilities, they can send that energy back to the grid and sell it.

Can you sell solar power without battery storage?

Without battery storage, this excess electricity flows back into the utility grid for other customers to use. According to the National Renewable Energy Laboratory (NREL), this two-way relationship between your property and the electrical grid makes selling solar power possible. Here's how it works:
