

Can the inverter be used as a battery

Overview

Do inverters need batteries?

For most residential and small commercial setups, the traditional battery and power inverter combo is the preferred choice to ensure continuous power supply during blackouts. So, while some inverter types do not require batteries, if your priority is uninterrupted backup power, investing in a quality battery in inverter system is essential.

Do I need an inverter for my solar system?

The inverter is connected to the battery and turns DC into AC. If you only run DC powered devices, you don't need an inverter. But almost all appliances use AC, so an inverter is required. Once solar power is in the battery, the inverter transforms it into AC, which is what home appliances use. Ready to size your solar system the smart way?
