

Canada Toronto exempts bifacial solar modules

Overview

Will bifacial solar panels lose exemption?

In addition to bifacial panels losing their exemption, the Biden Administration said it will raise the tariff-rate quota (TRQ) of silicon solar cells by 7.5 GW, if needed.

What are bifacial solar panels?

Bifacial solar panels are an innovative solar technology that has been gaining traction in Canada in recent years. In fact, the International Technology Roadmap for Photovoltaic (ITRPV) predicts rising demand for crystalline silicon (c-Si) bifacial solar cells and modules in the global photovoltaic market throughout the coming decade.

How many solar modules does Canadian Solar have?

By October 2022, Canadian Solar has shipped more than 80GW solar modules to customers in over 160 countries worldwide and owns a global portfolio of 25GW solar PV projects and 40GWh energy storage projects.

Will bifacial solar importers be able to certify pre-existing contracts?

The Biden Administration is providing a slight safeguard to bifacial importers. Those with pre-existing contracts for bifacial solar modules to be delivered within 90 days of today's exclusion removal will be able to certify those contracts to continue using the exclusion for that period.
