

Canada solar and Energy Storage

Overview

What is Canada's solar energy capacity?

Canada's total wind, solar and storage installed capacity is now more than 24 GW, including over 18 GW of wind, more than 4 GW of utility-scale solar, 1+ GW on-site solar, and 330 MW of energy storage. Canada's solar energy capacity (utility-scale and onsite) grew 92% in the past 5 years (2019-2024).

Who is energy storage Canada?

Energy Storage Canada is the only national voice for energy storage in Canada today. We focus exclusively on energy storage and speak for the entire industry because we represent the full value chain range of energy storage opportunities in our own markets and internationally.

What types of energy storage are available in Canada?

There are three main types of energy storage currently commercially available in Canada: Storage is playing an increasingly important role in the electricity system by improving grid reliability and power quality, and by complementing variable renewable energy sources (VRES) like wind and solar.

How big is Canada's energy storage industry?

The field of energy storage is also growing rapidly: Canada currently has a total utility-scale energy-storage capacity of more than 130 MW / 250 MWh, 10 percent of which came online in 2020 alone.
