

# **Canadian Mobile Energy Storage Container Single Phase**

## Overview

---

Is e-storage launching a modular grid-scale battery?

Canadian Solar's subsidiary e-Storage will launch its newest modular grid-scale battery, the FlexBank 1.0, at the RE+ trade show in Las Vegas, Nevada September 8-11. The scalable battery offers up to 8.36 MWh of energy capacity and either a 2 MW, four-hour duration configuration or a 4 MW, two-hour configuration.

What types of energy storage are available in Canada?

There are three main types of energy storage currently commercially available in Canada: Storage is playing an increasingly important role in the electricity system by improving grid reliability and power quality, and by complementing variable renewable energy sources (VRES) like wind and solar.

When did energy storage start in Canada?

The first energy storage project in Canada, the Sir Adam Beck Pump Generating Station, came online in 1957. However, the next project did not come online until 2013. There are three main types of energy storage currently commercially available in Canada:.

What is the fastest growing energy storage technology in Canada?

BESS is the fastest growing energy storage technology in Canada and is also the dominant storage technology in terms of capacity and number of sites. All but four projects proposed to be commissioned by 2030 are battery storage, with two CAES and two PHS projects also proposed.
