

Canberra EK Energy Storage Project Management

Overview

What is the Big Canberra battery project?

The Big Canberra Battery project consists of a 250-megawatt, 500 megawatt-hour BESS facility in Williamsdale, ACT.

Will a big battery power Canberra?

The government said the big battery project will be capable of responding rapidly to network constraints and will be able to store enough renewable energy to power one-third of Canberra for two hours during peak demand periods. The Williamsdale battery will be developed, built and operated by Macquarie Group offshoot Eku Energy.

Will a 250 MW / 500 MWh battery energy storage system 'future proof' Canberra?

The way has been cleared for construction to begin on a 250 MW / 500 MWh battery energy storage system that will help “future proof” the Australian Capital Territory’s energy supply by reducing the load on Canberra’s electricity network and increasing network reliability.

Who is Eku energy?

The ACT Government awarded a contract to Eku Energy, an energy storage firm established by Macquarie’s Green Investment Group – a part of Macquarie Asset Management – to deliver the 250-megawatt, 500 megawatt-hour battery energy storage system facility in Williamsdale, southern Canberra.
