

Canberra Sunshine Energy Storage Power Supply Price

Overview

How many battery energy storage systems are there in Australia?

A record 57,000 residential battery energy storage systems, with a combined capacity of 656 MWh, were installed in Australian homes in 2023. About 250,000 Australian homes, totaling 2,770 MWh, now have battery systems.

Are battery storage investments profitable in Australia?

Investments in battery storage within Australia's National Electricity Market (NEM) are increasingly profitable due to higher power price volatility and changing market dynamics, according to the latest report by Wood Mackenzie. Australia is a leader in renewables deployment, but battery storage investments have lagged.

How much does a solar battery cost in Australia?

A decent-sized (10kWh) solar battery starts at about \$7,000 before installation. The table above shows the hardware retail price ¹ for most home batteries in Australia as of May 2025. The prices include the Federal Battery Rebate. This cuts the cost of installed batteries by around \$330 per usable kWh and is available throughout Australia.
