

Canberra s simple solar solar container energy storage system

Overview

The CAPS Mobile solution is a solar power generator in the form of a shipping container that comes pre-wired, pre-connected together with batteries and which can be deployed in less than 2 hours. What is a solar container build?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system. What's included in a solar container build?

.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

What are the benefits of a solar energy storage system?

Scalable Capacity – Expand energy storage by adding more containers as your power needs grow. Off-Grid & Hybrid Capability – Works with solar, wind, or diesel generators for flexible energy management. Safe & Secure – Fire suppression systems, thermal management, and advanced monitoring ensure safe operation.

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.
