

# **Chile North America Grid Energy Storage**

## Overview

---

How many energy storage projects are in Chile?

Currently, 36 of the 129 large-scale projects Latin America projects with an energy storage component under development are in Chile, including 32 out of 71 of the region's early works projects. The storage technologies either in use or being considered include:

How can solar energy and storage improve grid stability in Chile?

Integrating solar energy and storage technologies is crucial for addressing the intermittency and grid stability in Chile. Key projects include Cerro Dominador, solar and PV hybrid, Zelestra's 220 MW solar and 1 GWh battery project, and AES Andes solar and battery storage hub.

Will Chile be able to develop energy storage projects in 2024?

In 2022, Chile passed an energy storage and electromobility bill, which made stand-alone storage projects profitable, but the market is still expecting new rules on capacity payment for storage projects, which are to be approved in 2024. Chile has also put in place an auction procedure to award public land for the development of BESS projects.

Will Chile achieve a 100% renewable grid by 2050?

Chile's goal to achieve 80% renewable grid by 2030 and a 100% zero emissions grid by 2050, will require an estimated 2,000 MW of energy storage every 10 years.
